## SUBJECT INDEX

### A

- Abdominal unipolar leads, thoracic and additional, value of, for diagnosis of location and extension of myocardial infarctions (Lambert), 40
- Aberrant conduction in supraventricular extrasystoles eliminated by exercise (Boikan and Gunnar), 626
- Acetyl-digitoxin (Löffler et al.), 887
  - effect of treatment with, on venous pressure, circulation time, and vital capacity in patients with heart failure (Table IV) (Löffler et al.), 904
- ACTH, effects of cortisone and, on artificially induced cardiac infarction in dog (Hoover and Manning), 343
- Activation, atrial, right (Puech et al.), 177
  - auricular, abnormal, considerations on (Puech et al.), 189
  - left (Puech et al.), 181
  - normal, in dog's heart (Puech et al.), 174
  - conditions at epicardial surface of left ventricle, investigation of (Durrer and van der Tweel), 193
  - process, general, study of (Puech et al.), 183
  - septum, interatrial (Puech et al.), 183
  - spread of, in left ventricular wall of dog. II (Durrer and van der Tweel), 192
- Albumin, serum, human, iodinated, blood volume in congestive heart failure as determined with (Kaplan et al.), 824
- Alpha-tocopherol administration, effect of systemic and local anoxia, of cardiac failure and compensation, and; studies on whole blood and muscle creatine levels (Sutton et al.), 67
- Aminophylline, response of Parephyllin as compared to, in various types of patients studied. (Table III) (Moyer and Snyder), 916
- Amyloidosis, "primary" (Jackson and Slavin), 839
- Anatomy, functional, and "throttle valve" action of pulmonary veins (Burch and Romney), 58
- Aneurysm, pulmonary artery, with thrombosis, interventricular septal defect, "cyanose tardive," and paradoxical systemic arterial embolizations (Richards and Cohn), 313
- Angina pectoris, transient electrocardiographic changes identical with those of acute myocardial infarction accompanying attacks of (Roesler and Dressler), 520
- Angiocardiography and cardiac catheterization, performance of, as combined procedure (Dickerson), 252
- Angioquimografia, 474 (B. Rev.)
- Announcements, 157, 318, 475, 476, 794
- Anomaly, Ebstein's, of tricuspid valve (Götzsche and Falholt), 587
- Anoxemia test, duration of Q-T interval during (Roehm et al.), 204
- Anoxia, systemic and local, effect of cardiac failure and compensation, of alpha-tocopherol administration, and; studies on whole blood and muscle creatine levels (Sutton et al.), 67
- Aorta, presubclavian coarctation of (Bahn et al.), 444
- Aortic stenosis, ballistocardiogram in (van Lingen et al.), 560
  - valve, bicuspid, clinical diagnosis of (Tranchesi et al.), 664
  - valvular disease, correlation of clinical and physiologic findings in patients with (Goldberg et al.), 555
  - dynamics of (Goldberg et al.), 527
- Aramine, cardiovascular and renal hemodynamic effects of (Livesay et al.), 745
  - effect of continuous intravenous infusion of, on creatinine clearance, renal plasma flow, and hematocrit (Table IB) (Livesay et al.), 749
  - infusion of, on urinary excretion of water and electrolytes (Table II) (Livesay et al.), 751
  - renal hemodynamic and blood pressure response to continuous intravenous infusion of (Table IA) (Livesay et al.), 748
- Aranthol, analeptic effects of, in vasomotor depression induced by quinidine (Weisman et al.), 84
- Arterial embolizations, systemic, paradoxical, interventricular septal defect, pulmonary artery aneurysm with thrombosis, "cyanose tardive," and (Richards and Cohn), 313
- Artery, coronary, disease, effect of estrogens on plasma lipids in (Oliver and Boyd), 348
  - etiology of cardiac enlargement in coronary occlusion, hypertension, and (Master), 321
  - pulmonary, left, absence of (McKim and Wiglesworth), 845
  - thrombosis, simulating pulmonic valve stenosis with patent foramen ovale (Dimond and Jones), 105
- Asymmetrical shutter, ballistoscope recording with aid of (Losner), 34

 paroxysmal, Wolff-Parkinson-White syndrome associated with (Dunn et al.), 462
- Tetralogy of Fallot (Reinhold and Nadas), 416
- Thoracic and abdominal unipolar leads, additional value of, for diagnosis of location and extension of myocardial infarctions (Lambert), 40
- Thromboembolic complications from cortisone therapy (Russek et al.), 653
- Thrombosis, coronary, with myocardial infarction secondary to nonpenetrating injury of chest wall (Lehmus et al.), 470  
 pathogenesis and treatment of, 319 (B. Rev.)  
 pulmonary artery aneurysm with, interventricular septal defect, "cyanose tardive," and paradoxical systemic arterial embolizations (Richards and Cohn), 313  
 simulating pulmonic valve stenosis with patent foramen ovale (Dimond and Jones), 105
- "Throttle valve" action, functional anatomy and, of pulmonary veins (Burch and Romney), 58
- Torso, homogeneous, image surface of (Frank), 757
- Tricuspid valve commissurotomy with one-year follow-up (Trace et al.), 613  
 Ebstein's anomaly of (Götzsche and Falholt), 587
- Tumor, intra-atrial, functional mitral stenosis produced by (Likoff et al.), 619
- U
- Unipolar leads, additional thoracic and abdominal, value of, for diagnosis of location and extension of myocardial infarctions (Lambert), 40
- V
- Valsalva's experiment, left atrial and pulmonary "capillary" pressure curves during (Björk et al.), 635
- Valve, aortic, bicuspid, clinical diagnosis of (Tranchesi et al.), 664  
 tricuspid, commissurotomy with one-year follow-up (Trace et al.), 613  
 Ebstein's anomaly of (Götzsche and Falholt), 587
- Valvular disease, aortic, correlation of clinical and physiologic findings in patients with (Goldberg et al.), 555  
 dynamics of (Goldberg et al.), 527  
 of right side of heart (pulmonary stenosis and tricuspid regurgitation without septal defects), malignant carcinoid of small intestine with metastases to liver, peripheral vasomotor symptoms, bronchoconstriction, and unusual type of cyanosis (Thorson et al.), 795

- Vasomotor depression induced by quinidine, analeptic effects of Aranthal in (Weisman et al.), 84
- symptoms, peripheral, malignant carcinoid of small intestine with metastases to liver, valvular disease of right side of heart (pulmonary stenosis and tricuspid regurgitation without septal defects), bronchoconstriction, and unusual type of cyanosis (Thorson et al.), 795
- Vasopressin (Pitressin), certain cardiovascular effects of (Wakim et al.), 77
- Vector, cardiac, effect of heart position and rotation on: experimental study (Wolff et al.), 161
- Vectorcardiogram, dissection of: differential vectorcardiography (Hellerstein et al.), 887
- spatial, correlation of, with right ventricular hypertrophy (Elek et al.), 369
- in myocardial infarction typified by prominent R waves in leads  $aV_R$  and  $V_1$  (Elek et al.), 477
- Vectorcardiography, differential; dissection of vectorcardiogram (Hellerstein et al.), 887
- Veins, pulmonary, functional anatomy and "throttle valve" action of (Burch and Romney), 58
- Venous connection, pulmonary, total, anomaly of (Bruce and Hagen), 785
- pressure, circulation time, and vital capacity in patients with heart failure, effect of treatment with acetyl-digitoxin on (Table IV) (Löffler et al.), 904
- Ventilatory changes, circulatory and, of chronic rheumatic heart disease with mitral stenosis, effect of lanatoside C on (Gray and Gray), 282
- Ventricle, elbow-left, and elbow-right ventricle circulation times, pulmonary circulation time, obtained by means of fluorodensography with radiopaque substance (Neri et al.), 818
- left, investigation of activation conditions at epicardial surface of (Durrer and van der Tweel), 193
- with bundle branch block, depolarization of (Kennamer and Prinzmetal), 769
- Ventricular extrasystoles, significance of T-wave inversion in sinus beats following (Mann and Burchell), 504
- fibrillation and defibrillation through unopened chest, extracorporeal circulation in hypothermic dog with (Table I) (Juvenelle et al.), 696
- gradient, frontal plane, and its spatial counterpart, theoretical and experimental bases of (Simonson et al.), 122
- measurement, spatial vector, application of radial sheet modulator and SVEC to (Simonson et al.), 144
- hypertrophy, right, correlation of spatial vectorcardiogram with (Elek et al.), 369
- stenosis, right, of Bernheim type in case of septal infarction (Cordeiro), 112
- tachycardia, bidirectional, due to digitalis poisoning (Zimdahl and Townsend), 304
- due to idiopathic pericarditis controlled by simultaneous intravenous procaine amide and quinidine (Morris and Franklin), 919
- paroxysmal, Wolff-Parkinson-White syndrome associated with (Dunn et al.), 462
- wall, left, of dog, spread of activation in (Durrer and van der Tweel), 192
- Veratrum viride, temporary atrioventricular conduction disturbance associated with ingestion of (Zumoff), 630
- Visceral circulation, 155 (B. Rev.)

## W

- Wolff-Parkinson-White syndrome associated with paroxysmal ventricular tachycardia (Dunn et al.), 462

## X

- Xanthine compound, Parephyllin (diethylaminoethyl theophylline hydrochloride), cerebral hemodynamic response to (Moyer and Snyder), 912
- X-ray survey, chest, mass, Los Angeles County, cardiovascular aspects of (Jacobson et al.), 860
